

FloriMulch® Plus!

The original

“Environmentally Friendly” mulch.

- Holds all of the same qualities of our 100% Non-Cypress Melaleuca FloriMulch
- Features a root biostimulant called mycorrhizae...a fungi that once in contact with landscape plant roots encourages superior plant health that guards against drought and pathogens.
- Regularly applying mulch will enhance the planting bed with the nutritional - all natural mycorrhizae
- Exclusive Mycorrhizae Application places Forestry Resources at the forefront of natural bio-stimulant technology
